In recent years, Green Cars really have gone mainstream. Several of the best-selling cars in the country are now being offered in hybrid, diesel or even pure electric form, giving buyers the ability to drive the car they want with the powertrain they prefer.

"A growing number of both eco-conscious drivers are going 'Green' when it comes to the new car they choose to drive, and auto manufacturers have primed the pump with the widest array of offerings in the 'Green Car' segment than ever before," said Jack R. Nerad, executive editorial director and executive market analyst for Kelley Blue Book's KBB.com. "After driving and testing nearly every new vehicle on the market today, our editors compiled a 10 Best Green Cars list that provides a roadmap for consumers looking to get more miles from each gallon of gasoline or to eliminate gasoline altogether."

**Sample Selection of KBB.com's 10 Best Green Cars of 2013**

**2013 Nissan Leaf**
You won't find an all-electric car that offers a better balance of range, practicality, refinement and value than the Leaf. Nissan reduced the Leaf's starting price by $6,000 for 2013, so after the $7,500 federal tax savings, you can go all-electric for about $22,000.
City/highway/combined mpge: 130/102/116
Range: 75 miles

**2013 Tesla Model S**
One could argue that the 2013 Tesla Model S is the electric car most likely to gain mainstream success. With blistering acceleration, distinct but tasteful styling, abundant interior space and an EPA-estimated 265-mile range, the Model S is among the coolest cars available, electric or otherwise.
City/highway/combined mpge: 88/90/89
Range: 265 miles

**2013 Lincoln MKZ Hybrid**
While the badge might convey traditional luxury, the Lincoln MKZ Hybrid is a modern technological powerhouse on all fronts. From the hybrid powertrain to the MyLincoln Touch infotainment system to the sleek, coupe-like profile, Lincoln's gas/electric mid-size sedan is as contemporary a vehicle we've seen from the automaker in a long time.
City/highway/combined mpg: 45/45/45

**2013 Volkswagen Jetta Hybrid**
The first gas-electric Jetta is 1) a fun-to-drive European sedan that 2) returns 45 combined mpg and 3) starts under $26,000. The Jetta Hybrid is a triple threat that lets you go green and have fun at once.

City/highway/combined mpg: 42/48/45

**2013 Toyota Avalon Hybrid**
The Toyota Avalon is all-new for 2013 and, thanks to the available gas-electric hybrid powertrain, one of the newest members of the 40 mpg club. If comfort per gallon were a thing, Avalon Hybrid might be king.
City/highway/combined mpg: 40/39/40
