

Kelley Blue Book Analysis: Average New-Vehicle Transaction Prices Up Less Than 1% Year Over Year, Smallest Increase in Decade

- In July 2023, the average transaction price (ATP) for a new vehicle in the United States was virtually flat compared to July 2022, up less than 1%, the smallest increase in a decade.
- Electric vehicle (EV) ATPs – led by price cuts at Tesla – were down nearly 18% year over year in July 2023 to \$53,469 from \$65,108 one year ago.
- Incentives increased for the tenth consecutive month in July 2023; the average incentive package is now 4.4% of the average transaction price, the highest since October 2021.

ATLANTA, Aug. 9, 2023 /PRNewswire/ -- The average price Americans paid for a new vehicle in July 2023 was 0.4% higher than one year ago, the smallest year-over-year price increase in the last decade. According to Kelley Blue Book, a Cox Automotive company, the average transaction price (ATP) of a new vehicle in July was \$48,334, a month-over-month decrease of 0.7% (\$337) from June's ATP of \$48,671, and up only \$199 from one year ago. Compared to the start of the year, transaction prices are down 2.7%, or \$1,335, the largest January to July tumble in the past decade.

"New-vehicle price inflation has all but disappeared in 2023," said [Rebecca Rydzewski](#), research manager at Cox Automotive. "New-vehicle prices, primarily driven by cuts in luxury and electric vehicles, are decreasing as inventory is steadily improving. With higher inventories and higher incentives helping to keep downward pressure on prices, there certainly are good reasons for shoppers to be heading back into the market."

Kelley Blue Book

Auto manufacturers' incentive spend increased for the tenth consecutive month in July to the highest level since October 2021, averaging \$2,148, or 4.4% of the average transaction price. One year ago, average incentive spending was 2.4% of ATP.

Average Prices for Non-Luxury Vehicles Decreased in July

The average price paid for a new, non-luxury vehicle in July was \$44,700, down \$471 compared to June. Year over year, non-luxury prices increased by only 0.5%. However, non-luxury vehicle prices have held remarkably steady since January, fluctuating up and down by only a few hundred dollars.

The bigger story is that unlike five years ago, only one model transacted below \$20,000 in July. The Mitsubishi Mirage's average transaction price in July is reported as \$19,205. In July 2018, there were a dozen vehicles with ATPs below the \$20,000 barrier. In comparison, many of today's smallest vehicles, including the Hyundai Venue, Kia Rio, Nissan Versa and Toyota Corolla, are all transacting well over \$20,000. Notably, and in stark contrast to the under \$20,000 category, there were 32 vehicles in the Kelley Blue Book database transacting on average over \$100,000 in July, which excludes super exotics from Ferrari, Lamborghini, Rolls-

Royce and the like. In comparison, five years ago in the summer of 2018, there were only 12 vehicles in the over \$100,000 category.

The average incentive spend in the non-luxury segment was 4.3% of ATP in July, up from 2.5% one year ago. Mainstream brands with particularly tight inventory – Honda, Kia and Toyota – raised their incentive spending in July but were still below the industry average.

Average Luxury Prices Down Year Over Year, Largest Decline in a Decade

Luxury vehicle prices in July were down almost 3% year over year. The average luxury buyer paid \$63,552 in July, down \$192 from June. Since the start of the year, luxury prices have declined by more than 5%. Luxury market leader Tesla has slashed prices by more than 19% so far in 2023. According to Kelley Blue Book estimates, the average Tesla buyer spent \$54,660 for a new vehicle in July, down from more than \$62,000 in January and the lowest ATP for Tesla since April 2020.

Overall, the luxury segment continued to deliver strong results in July. The luxury share of the U.S. market was 19.3% in July, the highest share so far in 2023. According to Kelley Blue Book estimates, the lower prices at Tesla are likely helping with sales volume. In July, Tesla volume reached a record high of 59,813 units.

Electric Vehicle Prices Continue to Decline

EV prices continue to fall, once again led by market leader Tesla. In July, the average EV ATP was \$53,469, down from \$53,682 in June and down from more than \$61,000 in January. Incentives for EVs in July were 6.7% of ATP, or \$3,755. EV ATPs are down more than 19% from their recent peak of more than \$66,000 just a little more than a year ago in June 2022. The price declines in the EV segment have mirrored the inventory increases experienced by some automakers. At the end of July, the EV segment days' supply was near 100 days, while industry days' supply stood at 54. (Cox Automotive days' supply calculations include vehicles in dealer inventory and in-transit/pipeline units but do not include Tesla).

"The year-over-year decline of EV ATPs has been led by Tesla slashing prices on its popular models," added Rydzewski. "Tesla prices are down nearly 20% versus a year ago, and other EV models, such as the Ford F-150 Lightning, have been following Tesla's lead. While automakers report losing money on electric vehicles, they continue to aggressively pursue EV growth strategies."

Auto Incentives Offered by Manufacturers Reach One-Year High

Incentives averaged \$2,148 in July to reach the highest point in a year, increasing to 4.4% of the average transaction price compared to 4.2% in June. While July incentives increased by \$112 month over month, they remain historically low. For comparison, Kelley Blue Book estimates incentives averaged 5.9% of ATP in July 2021 and 10.3% in July 2019.

The high-end luxury car segment had the highest incentives in July 2023 at 9.6% of ATP, followed by luxury cars at 8.4%, hybrid vehicles at 7.7%, entry-level luxury cars at 6.9% and electric vehicles at 6.7%. Full-size luxury SUVs, high-performance cars and sports cars had some of the lowest incentives in July.

About Kelley Blue Book

Founded in 1926, Kelley Blue Book, The Trusted Resource®, is the vehicle valuation and information source trusted and relied upon by both consumers and the automotive industry for nearly a century. As the industry standard for generations, Kelley Blue Book provides transparent, objective information and data-driven, innovative tools for consumers, automotive dealers and manufacturers. The company publishes millions of market-reflective values weekly on its top-rated website KBB.com, from its famous Blue Book® Trade-In Values to the Kelley Blue Book® Price Advisor tool, which offers a range for what consumers reasonably can expect to pay for a vehicle in their area. KBB.com editors rate and review hundreds of new vehicles each year to help consumers understand the [Best Cars](#) and [Best SUVs](#) to meet their needs. Kelley Blue BookSM Instant Cash Offer provides a redeemable trade-in offer to transaction-ready consumers and conveniently connects them to local participating dealers. Kelley Blue Book's Service Advisor provides guidance on how much to pay for service and repairs, allowing consumers to schedule service with local dealers on KBB.com. The company also provides vehicle values to finance and insurance companies as well as governmental agencies. Kelley Blue Book is a Cox Automotive brand.

About Cox Automotive

Cox Automotive is the world's largest automotive services and technology provider. Fueled by the largest breadth of first-party data fed by 2.3 billion online interactions a year, Cox Automotive tailors leading solutions for car shoppers, automakers, dealers, retailers, lenders and fleet owners. The company has 25,000-plus employees on five continents and a family of trusted brands that includes Autotrader®, Dealertrack®, Kelley Blue Book®, Manheim®, NextGear Capital™ and vAuto®. Cox Automotive is a subsidiary of Cox Enterprises Inc., a privately-owned, Atlanta-based company with \$22 billion in annual revenue. Visit coxautoinc.com or connect via [@CoxAutomotive](#) on Twitter, [CoxAutoInc](#) on Facebook or [Cox-Automotive-Inc](#) on LinkedIn.
