

Double-Digit New-Car Sales Growth Expected In September 2015, According To Kelley Blue Book

Volkswagen Group Underperforms Industry Following Crisis; October and Beyond Could Prove Worse

IRVINE, Calif., Sept. 25, 2015 /PRNewswire/ -- [New-vehicle sales](#) are expected to increase 12 percent year-over-year to a total of 1.39 million units in September 2015, resulting in an estimated 17.5 million seasonally adjusted annual rate (SAAR), according to Kelley Blue Book www.kbb.com, the only vehicle valuation and information source trusted and relied upon by both consumers and the automotive industry. At 1.39 million units this will be the highest September sales volume since 2006.

Expect big increases across the industry in September, with the average gains from manufacturers in the double digits. Including Labor Day sales with September totals this year is one reason for the big jump, but the underlying demand for new vehicles remains strong. With the average age of vehicles on the road increasing, [used-car prices](#) on the rise and financing still inexpensive, it looks like new-car sales will continue to increase in the near future.

"While the Volkswagen scandal will have a negative impact on sales, the affected models represent less than a quarter of their portfolio, and some dealers have already depleted their stock of those units," said Alec Gutierrez, senior analyst for Kelley Blue Book. "The larger issue is the hit the automaker's brand image and perceived trustworthiness, which may affect sales of their other models. We think the effects on September sales won't be too bad for Volkswagen Group's combined sales, but October and beyond could be another story."

Key Highlights for Estimated September 2015 Sales Forecast:

- In September, new light-vehicle sales, including fleet, are expected to reach 1,390,000 units, up 11.9 percent from September 2014 and down 11.7 percent from August 2015.
- The seasonally adjusted annual rate for September 2015 is estimated to be 17.5 million, up from 16.4 million in September 2014 and down from 17.7 million in August 2015.
- Retail sales are expected to account for 86.7 percent of volume in September 2015, up from 85.5 percent in September 2014.

Ford Motor Company Continues Gains on Truck, Van Segments; Korean Brand Strength Attributed to Fleet Sales

[Ford Motor Company](#) should have another solid month of growth, with gains coming from the [truck](#) and [van](#) segments. The [Ford Transit van](#) is proving to be a success in the U.S., pushing the brand's van volume up 27 percent this year.

In addition, [Hyundai](#) and [Kia](#) could see some major sales improvements, with projected growth of 18 percent from this time last year, despite having product portfolios leaning heavily toward the declining car segment. However, some of the strength is attributed to the rise in the automaker's fleet sales, which are up 24 percent for the year.

Manufacturer	Sales Volume ¹			Market Share ²		
	Sep-15	Sep-14	YOY %	Sep-15	Sep-14	YOY %

Compact Utility Continues Streak as Most Popular Segment; Trucks Climb on F-150 Availability

For the second month in a row, the [compact utility](#) segment will be the most popular. In September, sales in this segment have flourished as U.S. gas prices approach the low \$2 range nationally, and year-to-date sales are up 14 percent.

"September also should be a strong month for truck sales, fueled by the low gas prices and the increased availability of the aluminum-bodied F-150," said Gutierrez. "The F-Series hit 70,000 units in August for the first time this year, and should show continued improvement this month."

Segment	Sales Volume ¹			Market Share
