1912 Chevrolet Series C Classic Six

The first step in establishing one of America's most iconic brands was introduced in 1911 and went on sale the following year. The seminal Chevrolet model was priced at a then-hefty \$2,150, which put it well out of the reach of blue-collar workers who barely earned that much as their annual wages. The model had only moderate success, but set the tone for what would become a megabrand.

1916 Chevrolet 490

While the first Chevrolet was positioned to the middle of the car-buying market – well-to-do professionals -- the 1916 490 was intended to go head-to-head with [Ford's](#) incredibly popular Model T. It got its name from its base price -- \$490 – a figure that not coincidentally was \$5 less than that of its prime rival, and it sent the brand on its present course.

1929 Chevrolet with Stovebolt-Six Engine

In the wake of Ford's introduction of the Model A, Chevrolet went its arch-rival two better – two cylinders, that is. Equipped with the legendary 'stovebolt' six-cylinder engine, the 1929 Chevrolets offered two more cylinders than Ford's 'four-banger' and established the brand as Ford's key competitor.

1936 Chevrolet Suburban Carryall

Recognized by most automotive historians as the first-ever sport utility vehicle, the 1936 Chevrolet Suburban Carryall combined a station-wagon body style with a half-ton truck chassis to create a new market segment that's still going strong after more than 75 years.

1948 Chevrolet Series 3100 Pickup

The 1948 Chevrolet Series 3100 Pickup set the stage for Chevy's modern-day pickups by introducing a new level of unexpected interior creature comforts, like a full three-across adjustable bench seat in place of the old trio of individual fixed-position perches, inside door locks, 'Four-fold' ventilation and an accessory AM radio.

1955 Chevrolet with Turbo-Fire V8

A double winner for the division, the 1955 Chevrolet line ushered in both the now-iconic 1955-1957 'Tri5' era and the spectacularly successful and incredibly long-lived small-block V-8 engine, which supplemented the veteran inline six. The introduction of the new Turbo-Fire V8 option helped Chevy sell more than 1.7 million units in this pivotal year.

1963 Corvette Sting Ray

Arguably the greatest and unquestionably one of the most desirable models of all time, the 1963 Chevrolet Corvette Sting Ray was a rolling revelation in style and technology that has influenced the look and feel of every successive generation.

1960-1969 Chevrolet Corvair

Created in response to the increasing threat posed by imports – notably the Volkswagen Beetle – the Chevrolet Corvair also was meant to counter the arrival of new downsized domestics like the Ford Falcon and Plymouth Valiant. Though many car reviewers liked Chevy's innovative approach to small-car design, Ralph Nader's devastating *Unsafe at Any Speed* inflicted a mortal wound to the car's reputation.

1967-69 Chevrolet Camaro

With the Ford Mustang galloping out of the blocks at a record sales pace, Chevy responded by introducing its own brand of pony car, the now legendary Camaro. Although it shared some platform mechanicals with the upcoming Chevrolet Nova, the Camaro's aggressively refined exterior styling set it well apart from its compact kin.

[2011 Chevrolet Volt](#)

A genuine revolution in automotive transportation, the 2011 Chevrolet Volt stands as one of the crowning achievements of the division's century of ongoing progress. Coupling knowledge gained from GM's pioneering EV1 electric car program in the 1990s, engineers on the [Volt](#) development team managed to bring this sleek, well-appointed four-passenger liftback sedan from an [auto show](#) concept to full production status in less than four years.
