

# Kelley Blue Book's kbb.com Announces Winners of 2007 Best Resale Value Awards

**Consumer Advice for Finding New Cars With Minimal Depreciation Down the Road**

PRNewswire  
IRVINE, Calif.

Kelley Blue Book ([www.kbb.com](http://www.kbb.com)), the leading provider of new and used vehicle information, announces the 2007 model year winners of its annual Best Resale Value Awards. Since depreciation (or loss of value) is typically a consumers' biggest expense during the first five years of vehicle ownership, these awards, like all of kbb.com's information services, are designed to help consumers make more informed car-buying decisions.

The following awards recognize automakers' outstanding achievements in design, engineering and production. They are based on projections by Kelley Blue Book's expert staff of market analysts encapsulated in the Kelley Blue Book Residual Value Guide. These prestigious awards honor vehicles expected to maintain the greatest proportion of their retail price after five years of ownership. Low-volume vehicles and vehicles with a Manufacturer's Suggested Retail Price of more than \$60,000 are excluded from awards consideration.

2007 BEST RESALE VALUE: BRAND  
Honda and Acura (tie)

2007 BEST RESALE VALUE: BY VEHICLE CATEGORY

BMW 5 Series	Scion tC
Honda Civic	Toyota Prius
Lexus IS	Volkswagen GTI
MINI Cooper	Volkswagen Eos

(All values based on the November/December 2006 Kelley Blue Book® Residual Value Guide).

While most car buyers today consider sticker price one of the most significant numbers when choosing a new vehicle, the editors at Kelley Blue Book's kbb.com recommend that shoppers consider a number they won't find today on any window sticker, its resale value. Depreciation often is the greatest expense incurred by drivers during the first five years of vehicle ownership. An average vehicle will only retain about 35 percent of its original value after a five-year ownership period, meaning that a \$20,000 new car today will only be worth somewhere close to \$7,000 after five years. Vehicles with average or below-average resale values are generally plentiful in the marketplace and easy to find, such as models often found in rental fleets. But certain vehicles are projected to hold their value better than others. Vehicles that maintain their value best generate consumer enthusiasm. Frequently they are in limited supply and high demand.

Vehicle shoppers can take several factors into consideration when buying a car to determine a vehicle's future value. Certain features available on new cars today will be desirable by a majority of used-car buyers three or five years down the road, and these features will help the vehicle maintain more of its original value. In-market shoppers should consider the following options in their next new vehicle to help better retain its value. First, choose a popular exterior color, such as black, white or silver. Then select equipment that many buyers want. Included on this list are: antilock brakes (ABS), alloy wheels, CD player/CD changer, parking sensors, navigation system, sensing cruise control and leather-covered seats. At the same time, avoid less popular colors and go easy on customization.

"Vehicles that are painted in odd colors and vehicles that have been overly personalized will be desired by a smaller group of people down the road," said Jack R. Nerad, executive editorial director and executive market analyst with Kelley Blue Book's kbb.com. "That will negatively affect their resale value."

While the company's Residual Value Guide has been published since 1981, Kelley Blue Book established its annual Best Resale Value Awards in 2003. Kelley Blue Book's residual values are projections based on current vehicle data, market conditions for each vehicle, competition in segment, expectations of the future economy and the combined experience of Kelley Blue Book's team of market and pricing analysts. Values reflect projected future wholesale pricing for clean, reconditioned vehicles at the end of a five-year lease period. Kelley Blue Book's residual values are used by banks, financial institutions, governmental agencies and the automotive leasing industry.
