

Kelley Blue Book's kbb.com Assists Shoppers in Reducing Vehicle Depreciation

KBB Identifies Features That Help Resale Value, Names 2006 Models With Best Resale Value

PRNewswire
ANAHEIM, Calif.

While most car buyers today consider sticker price one of the most significant numbers when choosing a new vehicle, the editors at Kelley Blue Book's kbb.com recommend that shoppers consider a number they won't find today on any window sticker. Depreciation often is the greatest expense incurred by drivers during the first five years of vehicle ownership. To get the most for their money, consumers should do some extra homework to ensure they make wise purchase decisions based on several key factors other than just the negotiated sale price.

"When purchasing a new vehicle, consumers often forget to take future resale value into consideration, something that can have a major effect on their finances a few years down the road," said Jack R. Nerad, editorial director and executive market analyst for Kelley Blue Book.

An average vehicle will only retain about 35 percent of its original value after a five-year ownership period, meaning that a \$20,000 new car today will only be worth somewhere close to \$7,000 after five years. Vehicles with average or below-average resale values are generally plentiful in the marketplace and easy to find, such as models often found in rental fleets. But certain vehicles are projected to hold their value better than others. Vehicles that maintain their value best are those that are designed and engineered well, and usually they are in limited supply and in high demand.

What can you do to enhance the resale value of a vehicle you're about to purchase? Certain features available on new cars today will be desirable by a majority of used-car buyers three or five years down the road, and these features will help the vehicle maintain more of its original value. In-market shoppers should consider the following options in their next new vehicle to help better retain its value. First, choose a popular exterior color, such as black, white or silver. Then select equipment that many buyers want. Included on this list are: antilock brakes (ABS), alloy wheels, CD player/CD changer, parking sensors, navigation system, sensing cruise control and leather-covered seats. At the same time, avoid less popular colors and go easy on customization.

"Vehicles that are painted in odd colors and vehicles that have been overly personalized will be desired by a smaller group of people down the road," said Nerad. "That will negatively affect their resale value."

Today, the editors of Kelley Blue Book's kbb.com recognized a distinct group of vehicles that will retain closer to 50 percent of their original value during a five-year ownership period.

The 2006 model year winners of Kelley Blue Book's Best Resale Value Awards are:

2006 BEST RESALE VALUE: BRAND
BMW and MINI (Tie)
