

CDMdata, Inc. Announces Rapid Retail for New-car Inventories Online

Product Allows Dealers to Advertise New Cars Online Faster, Supporting Increased Lead Generation

PRNewswire
IRVINE, Calif.

IRVINE, Calif., Oct. 9 /[PRNewswire](#)/ -- CDMdata, Inc., a Kelley Blue Book company, today announces the launch of Rapid Retail(SM), allowing dealerships to market their new vehicle inventory while the vehicles are being prepared for sale.

Rapid Retail takes a new vehicle from the dealer management system and applies a basic VIN decode to obtain as much information about the vehicle as possible. The data collected includes the VIN, stock number, year, make, model, trim, engine, drivetrain, transmission, mileage, pricing, color and certification.

After the VIN decode is complete, Rapid Retail will add a stock photo of the vehicle and distribute this information to the dealer's Web site and other retail sites where the dealership advertises. The data is sent on a nightly basis, along with any regular inventory. Once a vehicle is front-line ready, the dealer can enhance the advertised information by adding additional details, actual photos and vehicle comments. Dealers also have the option to suppress specific vehicles from being posted online.

"According to Kelley Blue Book's Market Research, seventy-two percent of new-car shoppers have already viewed or are planning to view new car inventory online," said Mike Romano, senior vice president of dealer strategy for Kelley Blue Book and chief operating officer for CDMdata, Inc. "With this in mind, CDMdata developed a product, allowing dealers to market their new-vehicle inventory much faster by minimizing the time-gap before a new car is ready to be advertised. The ability to market inventory online earlier increases the opportunity for lead generation, which then turns into faster sales."
